14 May 1947

MEMORANDUM FOR THE DEPUTY DIRECTOR:

Subject: Transpositional Analysis Technique to the
Solution of United States--USSR Problems

1. Your attention is invited to the attached papers on "Transpositional Analysis Technique to the Solution of US-USSR Problems."
2. Despite the statement of the Assistant Director of ORE that "it would be difficult adequately to staff such a project". It is the opinion of ICAPS that intelligence work along this general line is much more worthy of OIG attention than the current overemphasis on current intelligence.
3. Before discussing the possibilities of some such technique with the agencies, ICAPS would appreciate receiving the green light from the Director.

DONALD EDGAR
Chief, ICAPS
